Notes / differences requiring review

DEMONSTRATION ONLY. All figures are fictitious, not product recommendations. Roof R-30 specified versus R-28 recorded requires review. No real installation or manufacturer performance has been verified.

*Product R-value at the recorded thickness, from actual manufacturer data; not a generic per-inch estimate.

Specified R-values come from project documents. Refer differences to the responsible design professional.

Matching numbers alone do not confirm assembly suitability or code compliance.
